## Monroe County Opioid Task Force

In response to the current Opioid Epidemic, we seek a comprehensive multi-sector response with approaches that include prevention education, treatment, recovery, and enforcement strategies.

We seek to ensure that individuals and families impacted by the disease of addiction, have full and complete access to prevention, treatment and recovery services on par with coverage equal to that of other diseases, thus removing the stigma surrounding the disease of addiction.

### Recommendations:

We encourage you to ask your medical or dental provider the following questions if a narcotic pain medication is discussed:

- Are there risks associated with taking narcotic pain medications?
- How long can I safely take this narcotic pain medication?
- How would I know if I have become addicted to a narcotic pain medication?
- Are there other options or safer alternative therapies to better respond to pain?

### Opioid Overdose Training: Using Narcan to reverse an overdose

*Additionally, naloxone is available at all major pharmacies in Monroe County through a standing prescription. It is covered by most insurance plans. A separate prescription from your health care provider is not needed. With a naloxone kit and the proper training, together we can work to prevent overdoses in our community!*
